Leading a Front-end development team with experience in a product that manages Live images, Recordings and Events through our easy-to-use timelines, where it is possible have endless possibilities to make security more flexible in end-to-end monitoring in a given region. Which in turn covers other features through our AI (Artificial Intelligence) for Detecting people, Animals, Vehicles, License Plate Reading, delimiting the detection/Collision area and much more. The FullCam product continues with the same technology

cutting-edge, but with the difference of being 100% customizable, from the appearance of the platform to the storage location.
